

May 15, 1973

this and then we, the majority may wish to amend on Select File. Now it almost seems to me we ought to be able to amend on Select File under suspension of the rules the same as we amended on General File. But what's your thought on that?

SENATOR MARVEL: Okay, now if I understand you correctly, you would propose to advance the bill to E & R Initial which will move it over to Select File. Meanwhile, we could prepare a list of the amendments that were adopted yesterday for the information of the Legislature. Is that...

SENATOR PROUD: Excuse me, I had Senator Stahmer's suggestion essentially correct but I missed one word. He is suggesting that we advance, and I think this is a better suggestion, much better, that we advance LB 256 exactly as the Budget Committee put it on this floor and then on Select File with 25 votes we can amend it. This would put us back in the same position we were yesterday before we adopted these other amendments. Then if the membership feels that penal reform, for example, is important enough, we can adopt that on Select File. Now I frankly think that this is a good suggestion. What do you think of it, Senator Marvel?

SENATOR MARVEL: Well, I'll be very blunt with you. I think we ought to do it the other way as I thought you were going to suggest originally.

SENATOR PROUD: Well, why?

SENATOR MARVEL: I think--sir?

SENATOR PROUD: Why?

SENATOR MARVEL: I think...

SENATOR PROUD: Because this way we would be absolutely taking the recommendations of the Budget Committee and then after more mature consideration these same gentlemen that wanted to get their amendments on could attempt to do it on Select File but it would take 25 votes.

SENATOR MARVEL: Well, I, I think that if we were in the middle of session, I think this is fine. I think we're down to the last few hours and I frankly will say this--I'm not afraid of a fight but I do not feel that you're going to get that motion passed without quite a struggle and I think you can accomplish what you're trying to do within the time that we have left by advancing the bill as it is now and then we will prepare at your suggestion a list of those amendments that were put on yesterday. May I say, may I say this. I feel I'm in about the same position as the Chairman of the Banking Committee when a bill comes out of the banking committee and I don't remember whether it came out over their objection or not, that had to do with additional facilities, and that bill's on the floor and it's amended on the floor and then maybe the Chairman of the Banking Committee doesn't like it either but what can he do about it except to either vote against it or to go along with a change that was made within the rules of the legislative body, so I would say that in view of the time involved and I appreciate your taking the time to discuss this, time involved I think that we could profit more by advancing the bill as it is as I thought your original suggestion was and then we will prepare for you whatever information you need because at the moment I think you said to give you a list of the amendments that were made yesterday. This will then allow the Legislature to proceed the rest of the day, the rest of the morning, on General File and we will make maximum use of the time we have left to the best interest of all the bills involved.
